Proceedings of the 30th Conference of the International Group for the Psychology of Mathematics Education

Prague, Czech Republic
July 16-21, 2006

Volume 1
Plenaries, Research Forums, Discussion Groups, Working Session, Short Oral Communications, Posters

Editors: Jarmila Novotná
Hana Moraová, Magdalena Krátká, Naďa Stehlíková

Charles University in Prague
Faculty of Education
Proceedings of the 30th Conference of the International Group for the Psychology of Mathematics Education

Volume 1

Editors
Jarmila Novotná
Hana Moraová
Magdalena Krátká
Naděžda Stehlíková

Charles University in Prague
Faculty of Education
Czech Republic

The Proceedings are also available on CD-ROM

TABLE OF CONTENTS

VOLUME 1

Table of Contents 1-iii
Introduction 1-xlvii
Welcome 1-xxxiii
The International Group for the Psychology of Mathematics Education 1-lvii
Proceedings of previous PME conferences 1-lix
The review process of PME30 1-lxi
List of PME30 reviewers 1-lxii
Index of presentations by research domains 1-lxvi
List of authors 1-lxix

Plenary Lectures

Brousseau, Guy 1-3
Mathematics, didactical engineering and observation

Presmeg, Norma 1-19
A semiotic view of the role of imagery and Inscriptions in mathematics teaching and learning

Štech, Stanislav 1-35
School mathematics as a developmental activity

Tsamir, Pessia & Tirosh, Dina 1-49
PME 1 to 30 – Summing up and looking ahead: A personal perspective on infinite sets
Plenary Panel

Lins, Romulo (Panel coordinator)  
A centre and a mathematics  
1-67

Gooya, Zahra  
The necessity of collaborations between mathematicians and mathematics educators: Way to have “Mathematics is the center”  
1-73

Groves, Susie  
Generic versus subject specific pedagogy – Should mathematics be in the centre?  
1-77

Krainer, Konrad  
How can schools put mathematics in their centre?  
Improvement = content + community + context  
1-84

Rojano, Teresa  
Mathematics in the centre: The case of specific didactics  
1-90

Research Forums

RF01 Teachers researching with university academics  
1-95

Brown, Laurinda & Coles, Alf  
Seeing more and differently – telling stories: Collaborative research on mathematics teaching and learning  
1-96

Hošpesová, Alena & Macháčková, Jana & Tichá, Marie  
Joint reflection as a way to cooperation between researchers and teachers  
1-99

Lebethe, Agatha & Eddy, Neil & Bennie, Kendal  
Opening the space of possibilities: Tales from three teachers  
1-103

Novotná, Jarmila & Pelantová, Alena  
Diverse roles, shared responsibility  
1-106

Poirier, Louise  
Research with teachers: the model of collaborative research: Study of joint development mechanisms for an approach to the teaching of mathematics to Inuit children in Kindergarten and Primary grades 1 and 2  
1-109
Rosen, Gershon

*Developing a voice*

Zack, Vicki & Reid, David

*Learning about mathematics and about mathematics learning through and in collaboration*

**RF02** *Exemplification: The use of examples in teaching and learning mathematics*

Coordinators: Bills, Liz & Mason, John & Watson, Anne & Zaslavsky, Orit

Additional Contributors: Goldenberg, Paul & Rowland, Tim & Zazkis, Rina

Bills, Liz & Dreyfus, Tommy & Mason, John & Tsamir, Pessia & Watson, Anne & Zaslavsky, Orit

*Exemplification in mathematics education*

**RF03** *The conceptual change approach in the learning and teaching of mathematics: An introduction*

Coordinator: Vosniadou, Stella

Tirosh, Dina & Tsamir, Pessia

*Conceptual change in mathematics learning: The case of infinite sets*

Vamvakoussi, Xenia & Vosniadou, Stella

*Aspects of students’ understanding of rational numbers*

Merenluoto, Kaarina & Lehtinen, Erno

*Conceptual change in the number concept: Dealing with continuity and limit*

Van Dooren, Wim & De Bock, Dirk & Verschaffel, Lieven

*The linear imperative: Searching for the roots and the impact of the over-use of proportionality*

Biza, Irene & Zachariades, Theodossios

*Conceptual change in advanced mathematical thinking: The case of tangent line*
Christou, Konstantinos P. & Vosniadou, Stella

Students’ interpretation of the use of literal symbols in algebra –
A conceptual change approach 1-170

Resnick, Lauren B.

The dilemma of mathematical intuition in learning 1-173

Greer, Brian

Designing for conceptual change 1-175

Discussion Groups

DG01 Abstraction in mathematics learning 1-187
  Coordinators: Mitchelmore, Michael & Ozmantar, Mehmet Fatih & White, Paul

DG02 Indigenous communities and mathematics education: Research issues and findings 1-188
  Coordinators: Baturo, Annette & Amit, Miriam & Lee, Hsiu-Fei

DG03 Participation, thought and language in the context of mathematics education (2nd year) 1-189
  Coordinators: da Rocha Falcão, Jorge Tarcísio & Frade, Cristina & Lins, Romulo & Meira, Luciano & Winbourne, Peter

DG04 Facilitating teacher change 1-190
  Coordinators: Hannula, Markku S. & Sullivan, Peter

DG05 Troubling learners’ and teachers’ relationships with mathematics: Theoretical perspectives on researching learning mathematics 1-191
  Coordinators: Cotton, Tony & Hardy, Tansy & Mendick, Heather & Povey, Hilary & Walshaw, Margaret & Hanley, Una

DG06 Towards new perspectives and new methodologies for the use of technology in mathematics education 1-192
  Coordinators: Lins, Bibi & Giraldo, Victor & Carvalho, Luiz Mariano & Edwards, Laurie

DG07 The mathematics textbook – A critical artefact? 1-193
  Coordinators: Pepin, Birgit & Grevholm, Barbro & Straessser, Rudolf
DG08 *Argumentation and mathematics education: Some unifying thoughts*  
Coordinators: Schwarz, Baruch & Boero, Paolo

DG09 *Mathematics and gender: Setting research agendas*  
Coordinators: Steinthorsdottir, Olof Bjorg & Rossi Becker, Joanne & Forgasz, Helen

DG10 *Learners learning through their own activity: Multiple perspectives*  
Coordinators: Simon, Martin A. & Dougherty, Barbara

DG11 *Mathematics education and society – MES*  
Coordinators: Gates, Peter & Zevenbergen, Robyn

**Working Sessions**

WS01 *Designing mathematical research-situations for the classroom*  
Coordinators: Knoll, Eva & Ouvrier-Buffet, Cécile

WS02 *COSIMA – An opportunity for mathematical communication*  
Coordinators: Cockburn, Anne D. & Peter-Koop, Andrea

WS03 *What is effective mathematics teaching? East meets West*  
Coordinators: Cai, Jinfa & Perry, Bob & Ying, Wong Ngai & Kaiser, Gabriele & Maass, Katja

WS04 *Gesture, multimodality, and embodiment in mathematics*  
Coordinators: Edwards, Laurie & Robutti, Ornella & Bolite Frant, Janete

WS05 *Teaching and learning mathematics in multilingual classrooms*  
Coordinators: Barwell, Richard & Civil, Marta & Diez-Palomar, Javier & Moschkovich, Judit & Planas, Núria & Setati, Mamokgethi

WS06 *Complexity research and mathematics education*  
Coordinators: Davis, Brent & Simmt, Elaine & Sumara, Dennis
WS07 *Purposeful professional development for mathematics teacher educators*

Coordinators: McMahon, Teresa & Sztajn, Paola & Ghousseni, Hala & Loewenberg Ball, Deborah

WS08 *Intuitive vs. analytical thinking: A view from cognitive psychology*

Coordinators: Ejersbo, Lisser Rye & Inglis, Matthew & Leron, Uri

**Short Oral Communications**

Abar, Celina A. A. P. & de Assis, Leila Souto

*The mathematics teachers’ conceptions about the possible uses of learning objects from RIVED-Brazil project*

Abdul-Rahman, Shafia

*On the way to understanding integration*

Abu-Naja, Muhammad & Amit, Miriam

*The impact of graphic-calculator use on Bedouin students’ learning functions*

Alagic, Mara

*How to put it all together? Redesigning learning activities to meet the needs of elementary teacher candidates*

Anku, Sitsofe E.

*Reading mathematics textbook as a storybook*

Arnau, David & Puig, Luis

*Naming and referring to quantities when solving word problems in a spreadsheet environment*

Back, Jenni

*If it divides by 4, it must divide by 8: Argument and argumentation in elementary school mathematics classrooms*

Barkai, Ruthi & Dreyfus, Tommy & Tirosh, Dina & Tsamir, Pessia

*Universal and existential mathematical statements – Secondary school teachers’ responses*

Benke, Gertraud

*Situations, linear functions and the ‘real world’*
Berenson, Sarah B. & Michael, Joan J. & Vouk, Malden
*The relationship between high school mathematics and career choices among high achieving young women*
1-220

Blair, Kristen Pilner
*Students’ understanding of ambiguity in symbols*
1-221

Bobis, Janette & Anderson, Judy
*Reform-oriented teaching practices and the influence of school context*
1-222

Bogomolny, Marianna
*Approaching linear (in)dependence with example-generation*
1-223

Bolite Frant, Janete & Font, Vicenç & Acevedo, Jorge
*Metaphors in teacher’s discourse: Graphing functions*
1-224

Bowers, Janet & Nickerson, Susan
*Designing instructional programs that facilitate increased reflection*
1-225

Braverman, Alex & Samovol, Peter & Applebaum, Mark
*Conformism in teaching mathematics*
1-226

Brocardo, Joana & Serrazina, Lurdes & Rocha, Isabel
*Constructing multiplication: Can pupils develop models for thinking?*
1-227

Brown, Susan A.
*The trigonometric connection: Students’ understanding of sine and cosine*
1-228

Bulmer, Michael & Lea, Bronwyn & Rolka, Katrin
*Student beliefs and attitudes from poetry writing in statistics*
1-229

Cabassut, Richard
*The teaching of proof in textbooks: a French-German comparison*
1-230

Canavarro, Ana Paula
*Classroom: A learning context for teachers*
1-231

Chamdimba, Panji C.
*An investigation of differences in performance in mathematics between parallel students and normal entry students at the Polytechnic – University of Malawi*
1-232
